Big Heat, Small Size, Tough

- Low amp draw means long hours of comfort without draining your battery.
- Integrated, variable speed switch allows the operator to set the comfort level.
- One installation kit fits most all UTVs.
- Mounting bracket rotates 180° from top to bottom for easy mounting to floor, firewall, or under dash.

**Aqua-Hot 100**, Part Number: EXE-200-100
Quiet, comfortable heat for two person UTV cabs, or small utility tractor enclosures, when battery power is limited.

**Aqua-Hot 200**, Part Number: EXE-200-200
Comfortable heat for UTV cabs of any size, Jeeps and other off road vehicles.

Diverter Manifold: PLE-200-100
Reduces engine overheating when plumbing Aqua-Hot heaters into the UTV's radiator hose by reducing coolant flow restriction. NPT x barb fittings are not included.

Barbed Fitting Assortment: PLE-200-151
All barbed fittings necessary to install the Aqua-Hot Diverter Manifold on most any UTV. Kit includes:
- 2 - 1/2" NPT x 3/4" Barb fittings
- 2 - 3/4" NPT x 3/4" barb fittings
- 2 - 3/4" NPT x 1" barb fittings
- 2 - 3/4" NPT x 22mm barb fittings

Komfort Heater: EXX-D16-200
38,000 BTUs, three-speed fan, and 320 CFM provide all the power you need to defrost windows in large vehicles and to duct heat to particular areas.

Cozy Heater: EXE-103-0EX
8,200 BTUs and using only 1/2 of an amp, the twin axial fans provide very quiet, low velocity, low energy heat. Plenum for ducting and grille for covering wall opening are also available.

Whisper Heater: EXE-505-65A
4,000 BTUs and using less than 1/2 of an amp, the radial axial fan provides very quiet, low-velocity, low-energy heat. Stainless steel cover included.

Aqua-Hot Installation Kit: PLE-200-150
All components necessary to install the Aqua-Hot 100, or Aqua-Hot 200 in most any UTV, including the Diverter Manifold and Barbed Fitting Assortment.
